Debrecen, Hungary

PHARMAFLIGHT Aeromedical Center

Dear ESAM Members,

I would like to express my interest in applying for a position of ESAM EC.

I am a Chair of the Hungarian Association of Aeromedical Examiners, and the Head of Aeromedical Center PHARMAFLIGHT Debrecen. We organized ICASM2019 Hungary, as many of You might remember, in Debrecen. At that time, and annually when I am responsible for our national conference in aviation medicine I clearly see that the collaboration and communication among colleagues is high priority.

Years of clinical practice as an internist and gastroenterologist are a solid background for me as an AME. Since 2017 I perform aeromedical examinations and since 2023 I am the Head of Aeromedical Center. Besides aeromedical examination my main interests are research and education. Our main field of research is aviation physiology, we study how fatigue affects different physiological parameters. I held a presentation at ICASM2019 and at AsMA2023.

We organize trainings for Hungarian colleagues and professional meetings regularly where we can discuss and share our local experiences as AMEs.

If I get a chance, I will support and help the work of ESAM, in the field that is needed, among others the education of AMEs, personal and online meetings and exchange of ideas and everyday work experiences.

Thank you for considering my application.
